

# AKASH KUMAR SHARMA

Business Analytics and Data Science Manager | AI | Enterprise Analytics

Email: aakash.ascend@gmail.com | Phone: +91-9686333180 | LinkedIn: linkedin.com/in/akashascend |

Portfolio: <https://github.com/aakashascend-cell>

## PROFESSIONAL SUMMARY

Strategic Data Science Professional focused on machine learning, AI-augmented workflows, and enterprise analytics across retail, e-commerce, and technology sectors. Expertise in leveraging Python, SQL, and cloud platforms to deploy predictive models for demand forecasting, drive customer segmentation, and architect automated data engineering pipelines. Strong communicator with a track record of translating complex technical architectures into business-optimising strategies that enhance operational efficiency and accelerate executive decision-making.

## PROFESSIONAL EXPERIENCE

**Manager, Business Analytics** | **Cisco Meraki India** | *October 2024 - Present*

- Designed and implemented a governed analytics MCP server on top of Snowflake to support financial metrics such as ARR, Bookings and product mix through controlled natural-language business queries.
- Modernised data engineering workflows by implementing Snowflake's AI capabilities to dynamically author a SQL codebase, scaling enterprise analytics infrastructure and increasing deployment velocity by 75%
- Established data alignment strategy across 3 business units, improving visibility into \$4.5M in cross-functional revenue opportunities and enabling data-driven financial planning.
- Designed enterprise-wide data governance and risk management framework, consolidating tools and eliminating \$2.1M in redundant spend through financial optimization.

**Analytics Lead (Acting Team Lead)** | **Lowe's India** | *February 2021 - October 2024*

- Integrated FP&A and supply chain analytics platforms, reducing executive financial reporting cycles from 3 days to 4 hours and enabling real-time KPI monitoring.
- Developed predictive models for demand forecasting and inventory optimization using Python, SQL, and ML libraries (scikit-learn, TensorFlow), reducing inventory risk by 23% across 5 business units.
- Conducted time series analysis and anomaly detection on sales patterns, generating 3+ monthly financial insights for proactive risk mitigation and revenue protection strategies.
- Built comprehensive financial and operational dashboards with real-time KPIs using Python visualization libraries, enabling data-driven strategic decisions.

**Business Analyst II** | **Amazon EU Sarl Luxembourg** | *February 2020 - August 2020*

- Led EU Softline Intelligence initiative, integrating sales and inventory data across 7 countries to identify €2.1M in cost optimization and financial performance improvements.
- Built predictive analytics models for demand optimization using statistical forecasting techniques, reducing weekly product gaps by 5% and improving fulfillment rates from 80% to 85%.

**Business Analyst** | **Cloudbail India** | *November 2017 - January 2020*

- Automated retail analytics dashboards using Qlik Sense, accelerating reporting cycles by 30% and surfacing \$1.8M in incremental revenue opportunities through data-driven insights.
- Developed customer segmentation and cohort analysis models using machine learning to optimize targeted marketing strategies and improve customer lifetime value predictions.

**Insight Analyst** | **Tesco India** | *April 2016 - November 2017*

- Built enterprise BI infrastructure with automated ETL pipelines using SQL and Python, reducing data processing time by 25% and enabling \$3.2M in operational and financial efficiencies.

**Software Engineer** | **Accenture India** | *March 2010 - June 2013*

## CORE COMPETENCIES & TECHNICAL SKILLS

**Leadership:** Analytics Leadership, Cross-Functional Team, Applied AI Strategy, Management, Stakeholder Communication | **Data Science & ML:** Predictive Modelling, Machine Learning, Statistical Analysis, Time Series Forecasting, Anomaly Detection, A/B Testing, Python (pandas, NumPy, scikit-learn, TensorFlow, matplotlib) | **Financial Analytics:** FP&A, Financial KPI Development, Risk Management, Revenue Optimization, Cost Analysis, Financial Forecasting | **Programming & Data:** Python, SQL, DAX, ETL/ELT Pipelines | **Cloud & Platforms:** AWS, GCP, Snowflake, Redshift, BigQuery | **Visualization:** Power BI, Tableau, QuickSight, Looker, Qlik Sense, Dashboard Design

## EDUCATION

**Post Graduate Diploma in Management Studies (MBA)** | **NMIMS Bengaluru** | *2014-2016*

**B.Tech in Computer Science** | **GGSIU Delhi** | *2005-2009*
